

Fremont-eLink

Advantages of Using Fremont-eLink

The Fremont-eLink system was designed to further enhance program service and support to our customers.

This innovative tool will allow for more precise control of your water treatment program.

Benefits of the eLink program:

- » Improved results tracking.
- » Efficient communication of results.
- » Ability to access and trend operating data.
- » Instant notification to shorten response time to critical set-point variances.
- » Inventory reporting and online product ordering.
- » Reduce treatment costs through more accurate results tracking.
- » Heightened operator awareness.

Data Logging and Communications

Taking Fremont's customer service to the next level.

*Fremont Focus:
water, people, future*

Phone (800) 436-1238

Easy Access

- » No software required.
- » Internet Explorer 5.5+ or Firefox 1.5+ and an internet connection are the only requirements.
- » Updates and new features appear automatically.
- » Intuitive, icon-based navigation insures ease of use.

Charts and Graphs

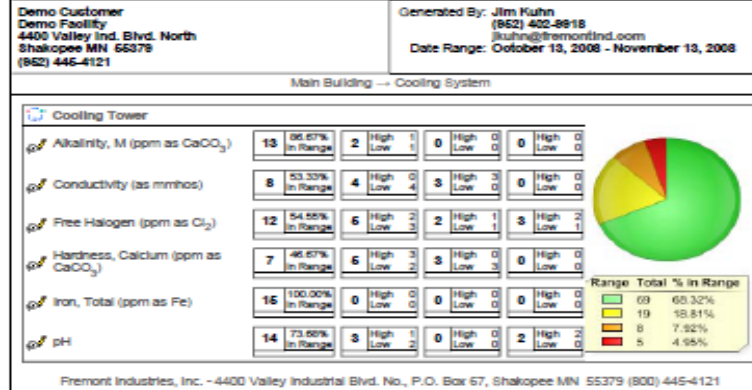

- » Compare controller data logs with Service Report and Operator Log test results.
- » Review daily, weekly, monthly and annual product usage.
- » Graph and compare reported test results.
- » Easily view all test results by accessing the system overview chart.

Alarms and Notifications

- » Receive user selected alarms via email, PDA or SMS compatible cell phones for:
 - ◇ Out of range test results.
 - ◇ Critical inventory levels.
 - ◇ *Future* sensor replacement needs.

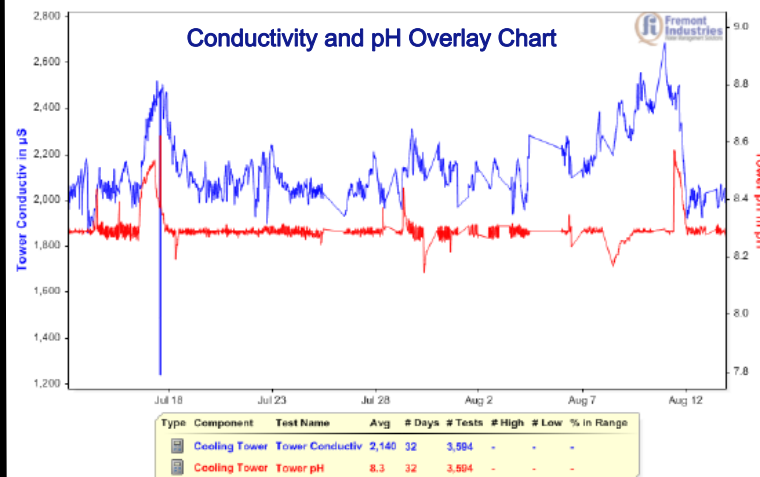

System History Report

Thursday, November 13, 2008 10:55 AM CST

Online Reporting

- » Color-coded control limits provide a visual indication of test results.
- » Test results easily graphed and trended.
- » Reports can be saved and emailed in pdf format, exactly as they appear online.
- » Corrective steps for out-of-range results can be tailored for your system.

eLink Activated Controller Compatibility

- » Configure controller to log up to 144 sample points per day to insure detailed and accurate results.
- » Graph and trend controller data recordings.
- » Configure controller to send inventory levels and test results directly to **Fremont-eLink** up to 48 times per day.
- » Compare or overlay controller data logs with Service Report and Operator Log test results.

Files and Attachments

- » Easily access up-to-date Material Safety Data Sheets and Product Data Sheets.
- » Access a library of training and reference materials, and water treatment-related literature.
- » Review and store photos of equipment inspections, site layout drawings, feed and control equipment model numbers and serial numbers, and more all in a safe and secure pdf format.

Let your Fremont Account Manager show you how the eLink system can complete your water treatment program.
